

Scope Of Work

- **Machinery Procurement and Installation:** Sourcing and installing all necessary machinery, including the pellet machine, hammer mill, dryer, conveyors, and other auxiliary equipment.
- **Design and Layout:** Developing a detailed plant layout, including the positioning of machinery, piping, electrical systems, and civil works.
- **Sales Support:** Providing comprehensive sales support, including technical consultations, product demonstrations, and after-sales services.
- **Manpower:** Providing skilled technicians for installation, commissioning, and operator training.
- **Plant Design and Layout:** Designing the overall plant layout, considering factors like material flow, safety, and operational efficiency.
- **Shed Construction and Layout:** Designing and supervising the construction of the plant shed, including foundation work, structural steel, roofing, and walling.
- **Tender Liaisoning:** Assisting with tender processes, including document preparation, bid submission, and contract negotiation.
